

Complete Streets: Promises and Proof

TSITE Winter Meeting
February 12, 2020

Southeast Transportation
Workforce Center

U.S. Department
of Transportation
**Federal Highway
Administration**

THE UNIVERSITY OF
MEMPHIS.

Talking Points

- What are Complete Streets?
- Promised Benefits
- Flawed Logic
- Case Studies
- What's Next for Complete Streets?

What are Complete Streets?

- Streets as Conveyance
- Standard Network Improvement Problem
 - Minimize travel time
 - Often benefit/cost analysis
 - Travel time savings at some \$ value of time
 - Yields automobile-focused designs
- Pro: benefit/cost analysis is easy
- Cons:
 - Induced demand
 - Limited space
 - One-size-fits-all

What are Complete Streets?

- Standard Network Improvement Problem
 - Minimize travel time
 - Often benefit/cost analysis
 - Travel time savings at some \$ value of time
 - Yields automobile-focused designs
- Pro: benefit/cost analysis is easy
- Cons:
 - Induced demand
 - Limited space
 - One-size-fits-all

- Streets as Space
 - Broad set of benefits
 - Emphasis on ALL users, ALL modes
- Pros:
 - Diverted demand
 - Efficient use of space
 - Context-Sensitive*
- Cons:
 - Awareness
 - Cost
 - Hard to compare

What are Complete Streets?

Complete Streets extend focus to ALL users and ALL modes:

- Transit
- Pedestrians
- Bikes
- Cars
- Shared micromobility
- Vendor/café space
- Elderly
- Users with disabilities

....with an emphasis on safety and context

Image credit: Robert Foster

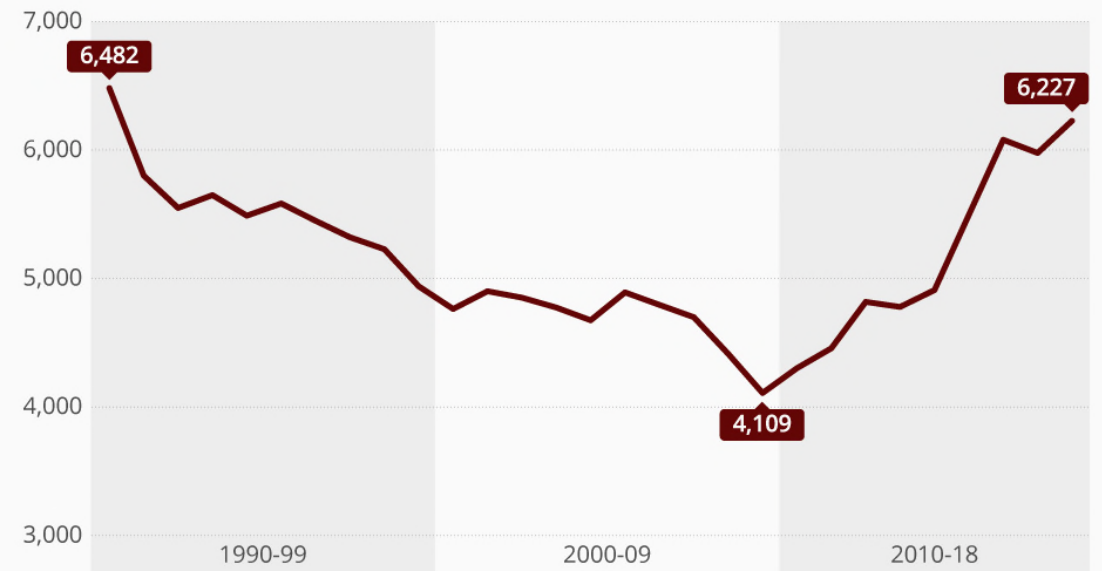

Why use Complete Streets?

- 12% of US households do not own a car (2014)
- Increase in bike/ped fatalities

Need to improve mode split and safety!

U.S. Pedestrian Deaths Reach Highest Level Since 1990

Pedestrian fatalities in the U.S. by year*

@StatistaCharts

* 2018 is a projection

- Safety
- Mobility
- Equity
- Environment
- Livability
- Economy

Before CS

After CS

Broad Ave, Memphis TN

Flawed Logic

Livable
Communities

Improve
Public Transit

Promote
Health

Keep Kids
Safe

Flawed Logic

Flawed Logic

Catastrophizing

1. I can't find my keys.
2. I'll be late for work.
3. My boss will be mad.
4. I'll get fired.
5. I'll get a poor reference.
6. I won't be able to find another job.
7. My family will starve.

Complete Streets

1. Complete Streets change the build environment.
2. Changing the built environment can affect behavior.
3. Changed behavior means greater participation in active transit.
4. Active transit is exercise.
5. Exercise can help prevent or treat some types of cancer.
6. Therefore, Complete Streets cures cancer.

Challenges to Implementation

- Partisanship
 - Complete Streets Act of 2009 / 2019
- Policy \neq Implementation
- Isolated costs, diffuse benefits
- Flawed performance measures

“bicycle trips as portion of total trips along project; measured by gender, age, income, race, ethnicity, and disability status”

~National Complete Streets Coalition

Case Studies

- Memphis, TN
- Somerville, NJ
- Thunder Bay, Ontario
- Washington, DC
- Las Cruces, NM

Case Studies

- Memphis, TN
- Somerville, NJ
- Thunder Bay, Ontario
- Washington, DC
- Las Cruces, NM

Case Studies: Discussion

- Anecdotal data is not proof!
 - Need detailed and rigorous study
- Smart Cities applications
 - Sensor tech, CAV readiness
- Start Small
 - Repaving projects

Case Studies: Discussion

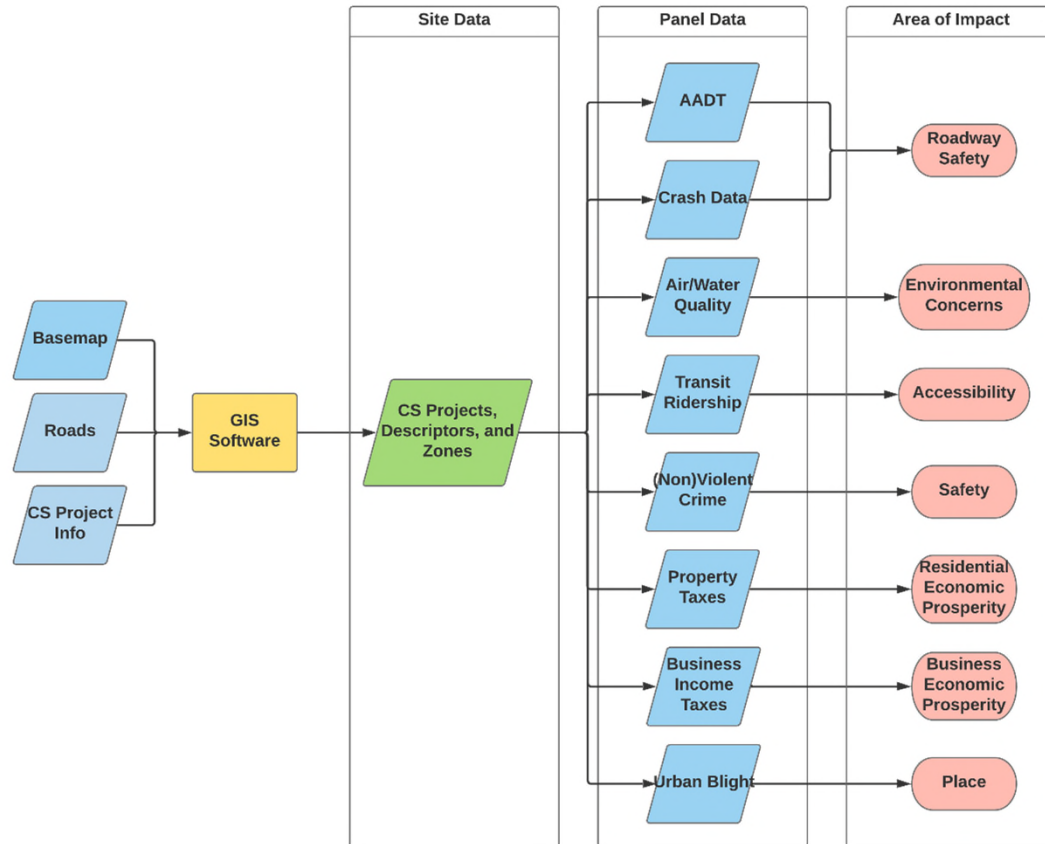

- 4 Hallmarks of Successful Projects:
 - Strong local champion
 - Advocacy
 - Communication & Community Buy-In
 - Iteration

Image credit: Meetingtomorrow.com

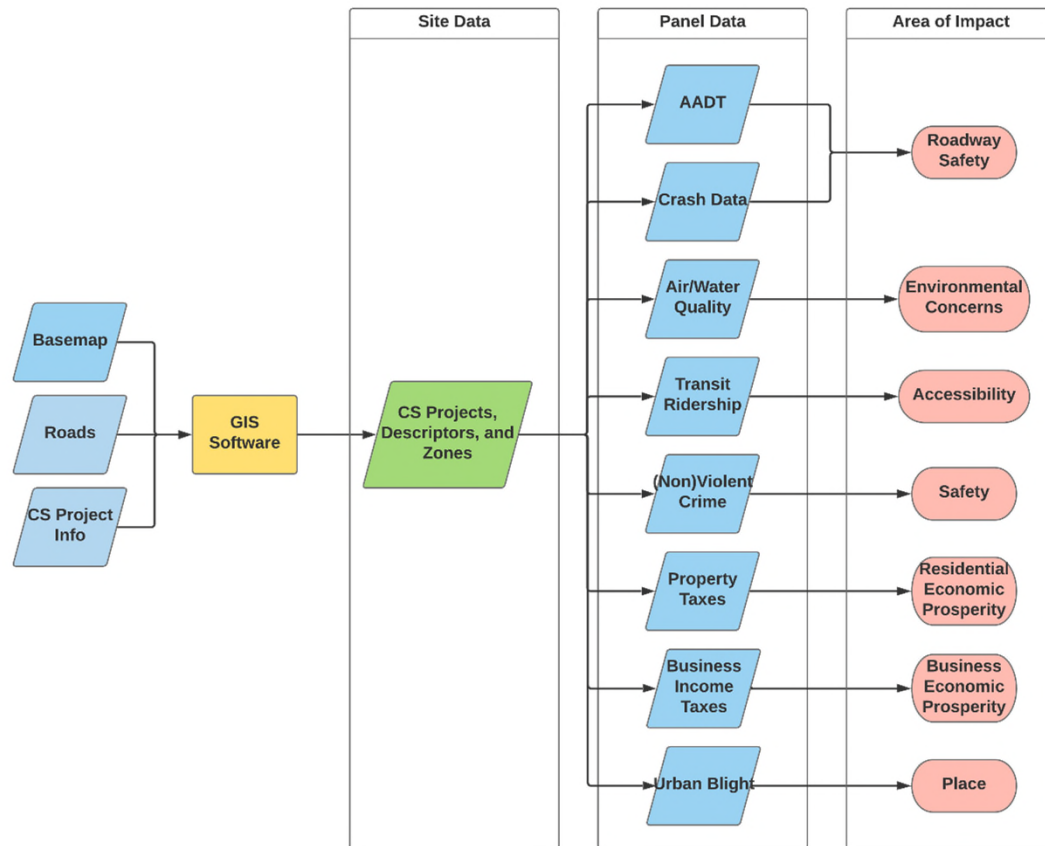

What's Next for Complete Streets?

- Evidence-based claims
- Are we meeting our goals?
- Model using publicly available data
 - Geospatial panel data

What's Next for Complete Streets?

- Listening session
 - Role of private sector?
 - Challenges to CS implementation?
 - Data collection/storage?
 - Interagency collaboration?

Thank You
