Tours

» KAT Electric Bus Tour

WEDNESDAY, OCTOBER 26, 2022. 2:40PM TO 4:10 PM

The Knoxville Area Transit (KAT) team will showcase Knoxville's new electric bus infrastructure. Participants will ride a KAT bus to a charging station while transportation officials describe the logistics and numerous benefits of this investment in sustainable mobility.

With their zero-emission drive, this fleet operates with 100% electric propulsion. Each electric bus helps us prevent nearly 300,000 pounds of greenhouse gas emissions in our community annually. That's like planting 2,283 trees.

» Urban Renewal Tour

THURSDAY, OCTOBER 27, 2022. 3:30PM TO 5:30 PM

Urban Renewal was established under Title I of the Housing Act of 1949. The federal government granted assistance and loans to local communities wanting to eliminate slums, urban blight, and substandard housing. Yet, the devastating consequences, that disproportionately targeted minority communities through eminent domain, resulted in the displacement of many families. Urban Renewal came to an end in 1974 but the ramifications of Urban Renewal continues.

The Beck Cultural Exchange Center will host this tour, beginning with a 20-minute film about the local impacts of Urban Renewal programs on Knoxville's Black heritage and landscape. Following that, participants will take a walking and driving tour of significant sites, as Rev. Renee Kesler provides historical context and shares the work being done now to preserve, teach and continue Black history and culture in Knoxville.

» South Waterfront/Sevier Avenue Redevelopment Area

THURSDAY, OCTOBER 27, 2022. 3:30PM TO 5:00 PM

This tour will view progress along the Sevier Avenue corridor, including new developments, and an ongoing streetscape project. Highlights include: the beautiful new Suttree Landing Park, greenways, new boat launch and pavilion, all from the seat of your E-bike or E-scooter! This tour will cover roughly four miles.

Much of the development was spurred by The Knoxville South Waterfront Vision Plan, adopted in 2006. The Vision Plan describes a long-term improvement strategy for an approximate 750-acre area fronting the 3-mile shoreline of the Tennessee River, directly south of downtown Knoxville and the University of Tennessee-Knoxville.

**All tours depart from the hotel lobby.*

Wednesday

11:30am	Registration: Second floor throughout conference

Keynote Speaker:
Benito O. Pérez, AICP CTP CPM CAPP

Mr. Pérez is the Policy Director of Transportation for America. He previously served in various roles at the District Department of Transportation since 2012, which included Curbside Management & Operations Planning Manager, Curbside Management Planner, and Transportation Policy Specialist. During his DDOT tenure, he worked on and managed a team involved with creating, accessing, analyzing, visualizing, disseminating, and working with stakeholders to leverage data for policy development, resource allocation, and operations management of the District's curbside and its intersection with the greater transportation network. Prior to DDOT, he was a Transportation Engineer with the Hampton Roads Transportation Planning Organization, working on long range transportation planning and its intersection with active transportation and land use. Additionally, he previously worked with the Maryland State Highway Administration. Mr. Pérez earned his Master of Arts in Urban Planning and Master of Science in Civil Engineering from the University of Florida in 2009.
