

Kevin Comstock has over 40 years of experience in the transportation industry and currently serves as a Management Consultant with KCI Technologies developing ITS, and TSMO Programs, along with Smart and Resilient Community Planning Programs. Prior to that he was the Smart City Director for the City of Chattanooga, TN.

He has held various positions in the private sector and in local and state government performing the design and construction of numerous Transportation and Telecommunications projects across the country. His specialties include project management, strategic planning and collaborative team building.

Kevin is a Subject Matter Expert currently working with the US Dept of Homeland Security on cybersecurity and smart community technologies. He is engaged with several academic institutions in the Region. Kevin currently serves on The University of Tennessee at Chattanooga's Center for Urban Informatics and Progress (CUIP) Advisory Board and was the 2017 President for Tennessee Section of the Institute of Transportation Engineers (ITE).

He and his wife of nearly 47 years spend much of their time with their two sons and five grandchildren.
